

Scenario 1 – Search Functionality

Weak Prompt:

Test the search feature.

ICEPOT Prompt:

Context:

Act as a Senior QA Engineer testing an E-Commerce application.

Instructions:

[MANDATORY] Generate 15 test cases for Search Functionality

[MANDATORY] Include Positive, Negative and Edge Cases

[MANDATORY] Include Functional and Non-Functional Scenarios

[MANDATORY] Include Filter and Sort Validation

[MANDATORY] Include Performance Validation

Example:

TCID | Description | Priority | Preconditions | Steps | Expected Result

Persona:

Act as a Test Lead and review the completeness of generated test cases before presenting them.

Output:

Generate output in tabular format suitable for Excel.

Tone:

Professional and structured.

Improvements:

1. Structured test cases
2. Better coverage
3. more detailed test cases

Scenario 2 – File Upload:

Weak Prompt:

Generate test cases for file upload.

ICEPOT Prompt:

Context:

Act as a Senior QA Engineer testing a Document Management System.

Instructions:

[MANDATORY] Generate 15 test cases for File Upload functionality.

[MANDATORY] Include Positive, Negative and Security Scenarios.

[MANDATORY] Validate File Type, File Size and Upload Failure Conditions.

Example:

TCID | Description | Priority | Preconditions | Steps | Expected Result

Persona:

Act as a Security Tester and QA Lead while reviewing test cases.

Output:

Generate output in tabular format suitable for Excel.

Tone:

Professional and structured.

Improvements:

1. File format validation
2. Security validation
3. Error handling scenarios

Scenario 3 – API Testing:

Weak Prompt:

Write API test cases for user registration.

ICEPOT Prompt:

Context:

Act as a Senior API Test Engineer.

Instructions:

[MANDATORY] Generate 20 API test cases.

[MANDATORY] Include Positive, Negative Scenarios.

[MANDATORY] Validate Request, Response and Status Codes.

[MANDATORY] Include Authentication and Performance Checks.

Example:

TCID | Description | Priority | Preconditions | Test Data | Expected Result

Persona:

Act as a QA Lead and API Architect reviewing the test coverage.

Output:

Excel-compatible table.

Tone:

Professional and detailed.

Improvements:

1. Status code validation included.
2. Better coverage
3. Structured test cases
